

Technical Data Sheet

For Academic Counseling and Credit-Awarding Purposes

DSST exams were developed to enable schools to award credit to students for knowledge equivalent to that learned by taking the course. The ultimate passing score for each exam is determined by each school. Each school is provided with a recommended passing score established by subject matter experts comprised of college faculty who teach the relevant course. The DSST program is approved by the American Council on Education (ACE), and ACE provides both a recommended passing score and number of credits that could be awarded to students who achieve a passing score.

35. Substance Abuse
36. Technical Writing
37. The Civil War and Reconstruction

National panels of subject matter experts and college faculty were formed for each exam. Test items were newly written to match the updated content outline for each exam. In addition to updating content of the exams, pass/fail standard-setting methodologies and new score scales were introduced in 2008.

Cut Score Determinations

Unlike the norm-referenced approach used previously for DSST exams, criterion-referenced methods are now used to set an absolute standard for all exams beginning in 2008. For each exam, subject matter experts participated in a series of standard-setting activities, including modified Angoff (1971) and Beuk (1985) procedures. For these procedures, the minimally competent candidate was defined as a student who would just pass the respective course.

Equating Multiple Forms

Multiple forms for each exam were constructed to include an overlap of items in common. These overlapping items were drawn strategically from across the testing domains to approximate the domain coverage plan established in the content outline for each exam. Separate standard-setting procedures were conducted on each individual form, and linear scaling methodologies were used to map raw scores to scaled scores.

Score Scales & Score Reporting

The new score scale introduced for the 2008 and later exams uses scores ranging from 200 to 500, with the cut score (pass point) set at 400 for all exams. Score reports for candidates provide scaled score achieved and corresponding pass/fail status.

B-Grade Equivalent Scaled Scores

Because of the conversion to criterion-referenced standard-setting, various grade equivalents were not established. However, some credit-awarding schools have requested a B-grade equivalent scaled score be provided in addition to the 400 cut score. B-grade equivalent scores have been calculated for each of the exams updated or introduced since 2008 and are provided, along with B-grade equivalents for the remaining norm-referenced exams, in the table on the next page.

B-Grade Equivalent Scores

Exam Title, 2008-present Updated Exams	Criterion-Referenced	Calculated B-Grade Equivalent
A History of the Vietnam War	40	434
Art of the Western World	40	434
Astronomy	40	434
Business Ethics & Society	40	434
Business Mathematics	40	434
Criminal Justice	40	434
